FEG X SmartDeFi™

FEED EVERY GORILLA (FEG) has been revolutionizing DeFi since January 2021. Built on the BNB Chain, FEG offers sustainability, security, and continuous rewards for its community.

Our SmartDeFi™ Token Launchpad, a FREE, twice-audited platform, empowers users to create secure, asset-backed crypto projects. Currently on BNB Chain, we are actively working to expand our launchpad across multiple EVM chains to maximize growth and accessibility.

FEG Token stakers earn rewards from transaction volume generated by FEG Token and all SmartDeFi projects launched on the platform.

Join us as we continue to reshape DeFi – powered by FEG and SmartDeFi!

The Protocol

✓ Advanced Token Creation

- Easily create advanced crypto tokens without technical expertise.

✓ Platform Compatibility

- Built on BNB Chain with planned expansion to additional EVM-compatible blockchains.

✓ Cost-Efficiency

- The launchpad is FREE to use, featuring tokenless presales with optional vesting rounds to enhance token safety and ensure sustainable liquidity.

✓ Real-World Asset-Tokenization

- Supports tokenizing real-world assets with optional KYC for security and compliance (excluding DEXs).
- Distributes dividends to investors via a fully-audited staking protocol, adding value and incentives.

✓ The protocol is audited by

SmartDeFi™ LaunchPad

A secure, flexible platform for token creation and liquidity – live on Mainnet.

✓ Twice Audited

SmartDeFi™ has passed two independent audits for enhanced security.

✓ Tokenless Presale (LGE)

Generate liquidity through a tokenless LGE with vested LP shares, solving common presale issues.

✓ Adjustable tokenomics

Update tokenomics with a 3-day security delay to adapt to project needs.

✓ Multi-asset backing

Back tokens with assets like ETH, USDC, and more for added stability.

✓ Interest-free loans

Borrow against your token's baseline value without selling or burning it.

Built by FEG

Combining security, liquidity, and flexibility to drive next-gen DeFi innovation.

SD LaunchPad

Create a new SmartDeFi™ token and define the essential parameters of your cryptocurrency token.

Token name: i.e. Bitcoin

Token symbol: i.e. BTC

Token supply: i.e. 21000000

V2 Router address: 0xD4584fs498as56d4sdagr6e5ga31

Tax on transfers: Off

Presale (LGE): On

Token preview:

NAME (SYMBOL)	Supply	Buy tax	Sell tax	Backing asset	Presale (LGE)

Protocol fee	0.5%	0.5%

Set backing asset address: Wrapped BNB (WBPNB) 0xae13d989...12a837C89BAa7cd

Create token

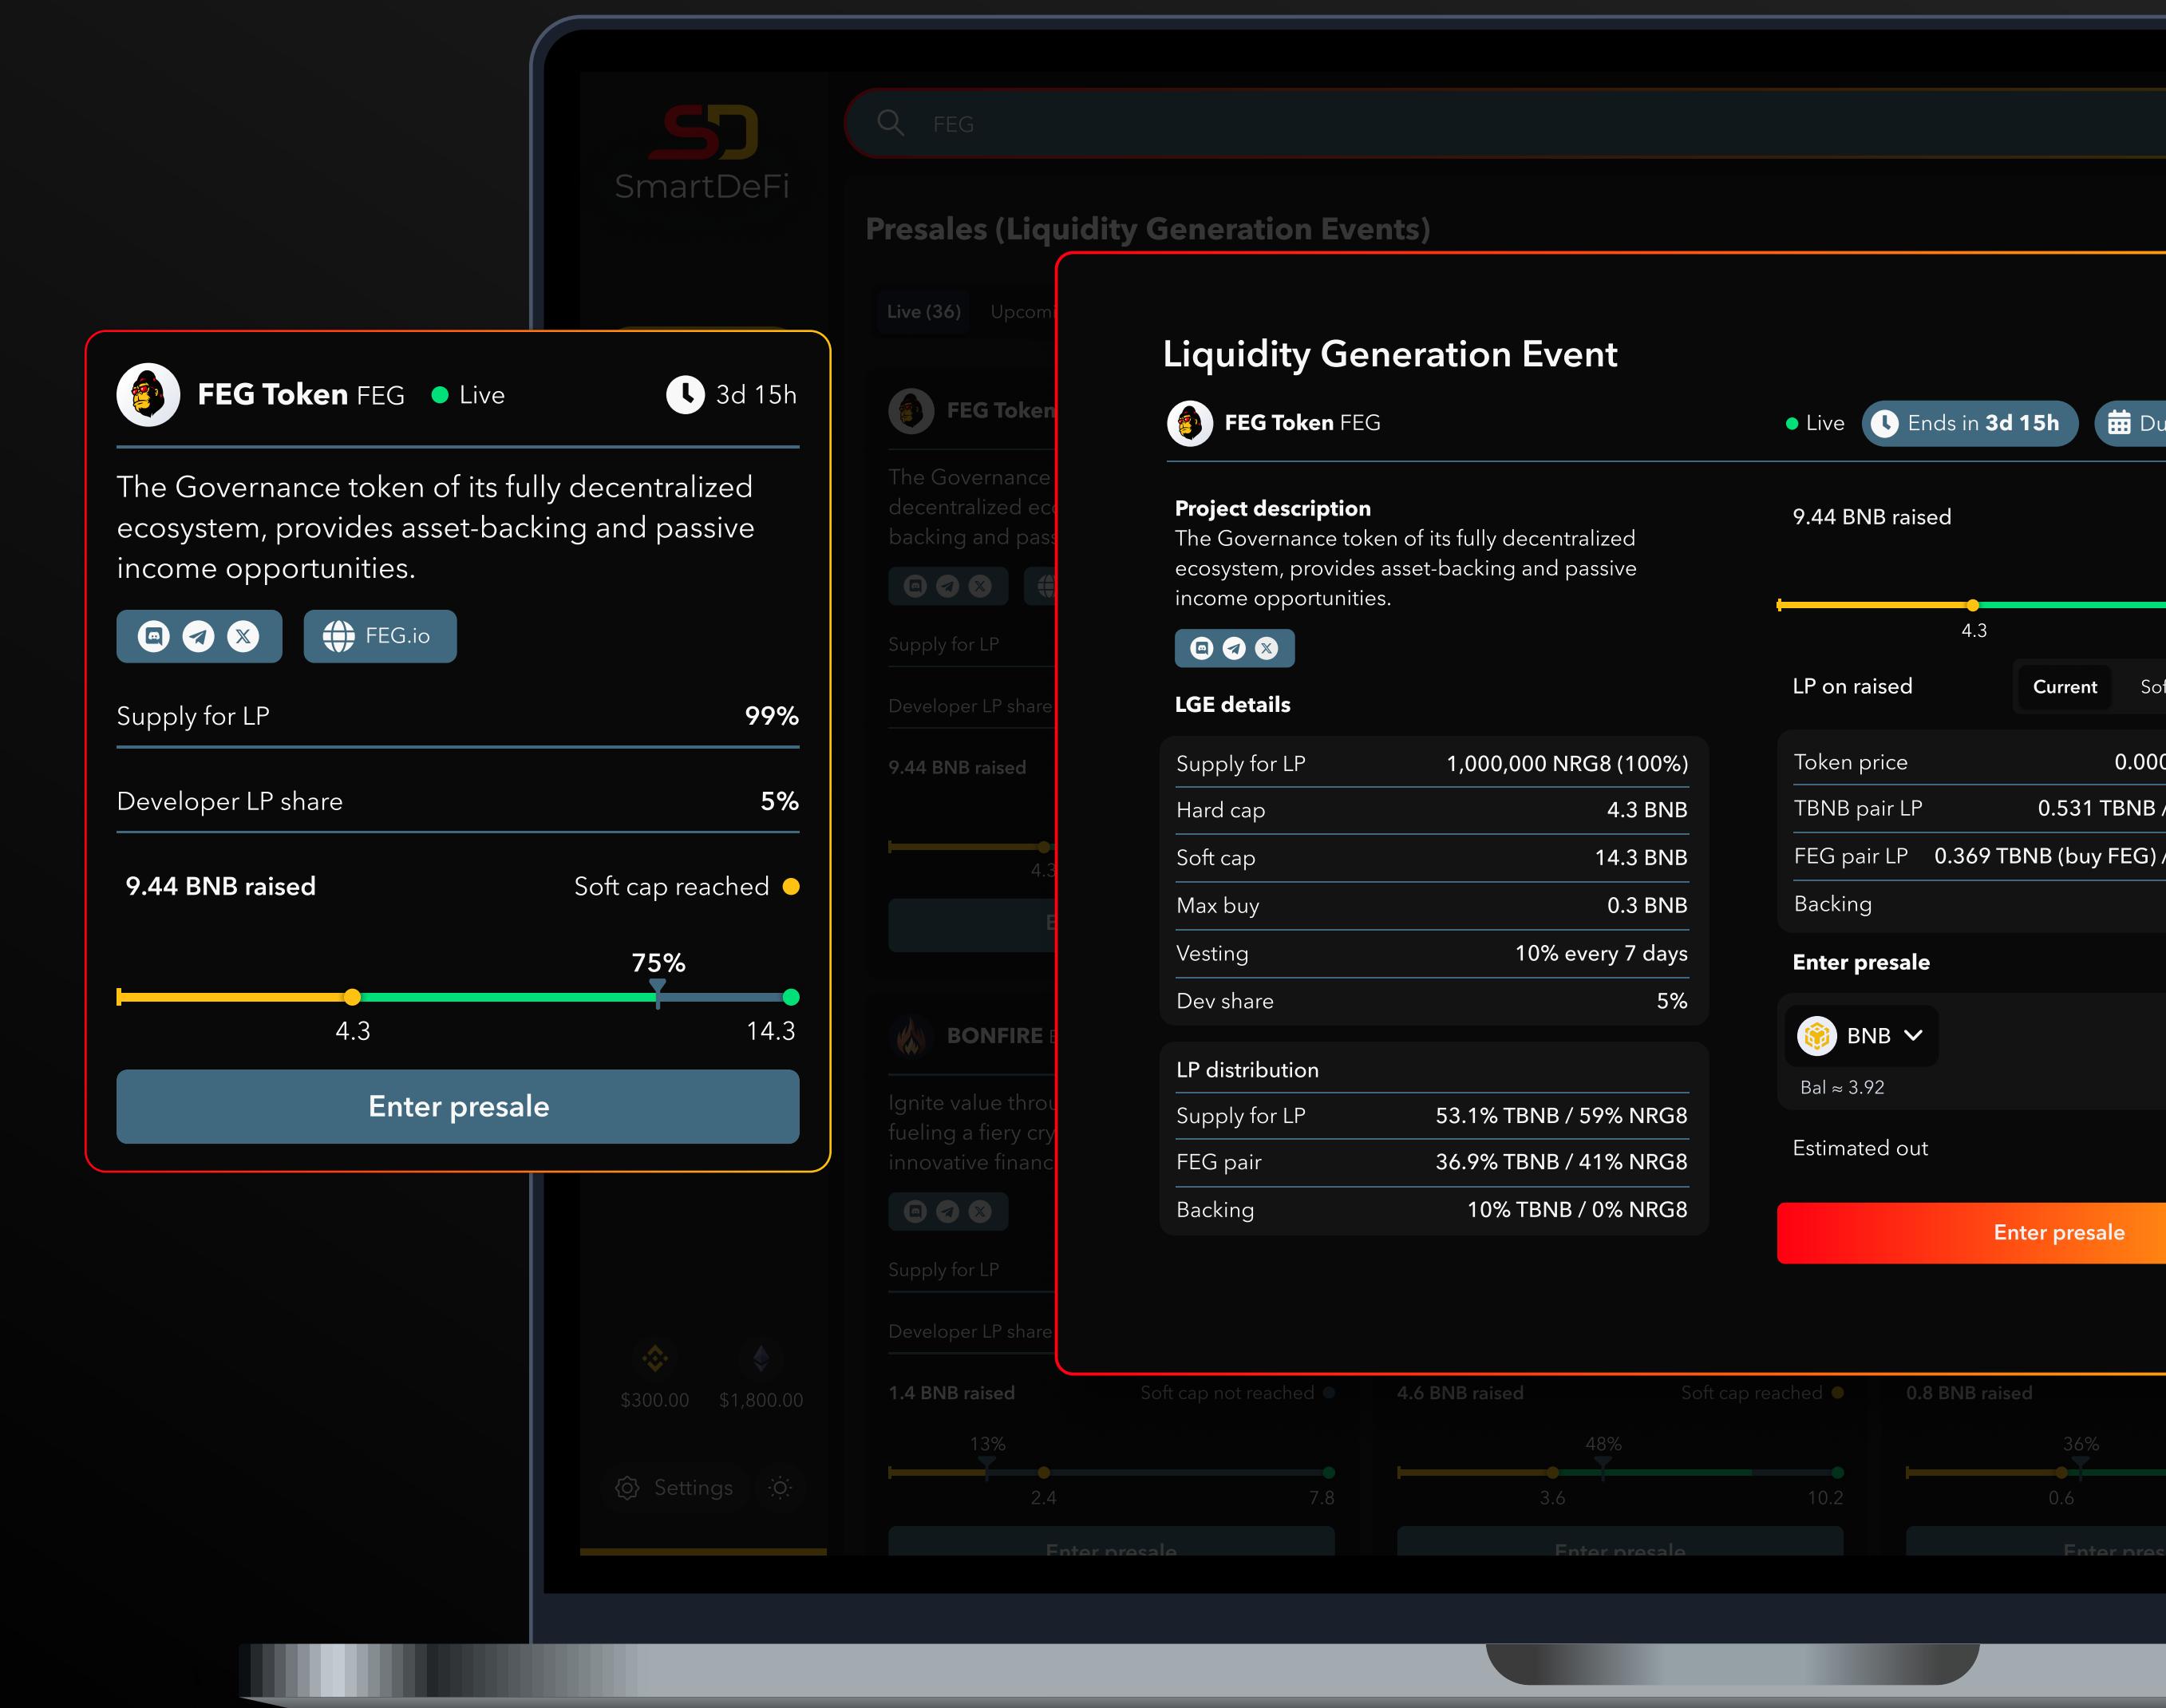

Tokenless Presales

A revolutionary method eliminating pump-and-dumps by having investors contribute directly to liquidity, with tokens distributed based on their value in BNB and securely held by the contract.

Withdrawals are paid in BNB, with equivalent tokens burned to protect the market price.

Participants also earn DEX liquidity provider fees for added rewards and incentives.

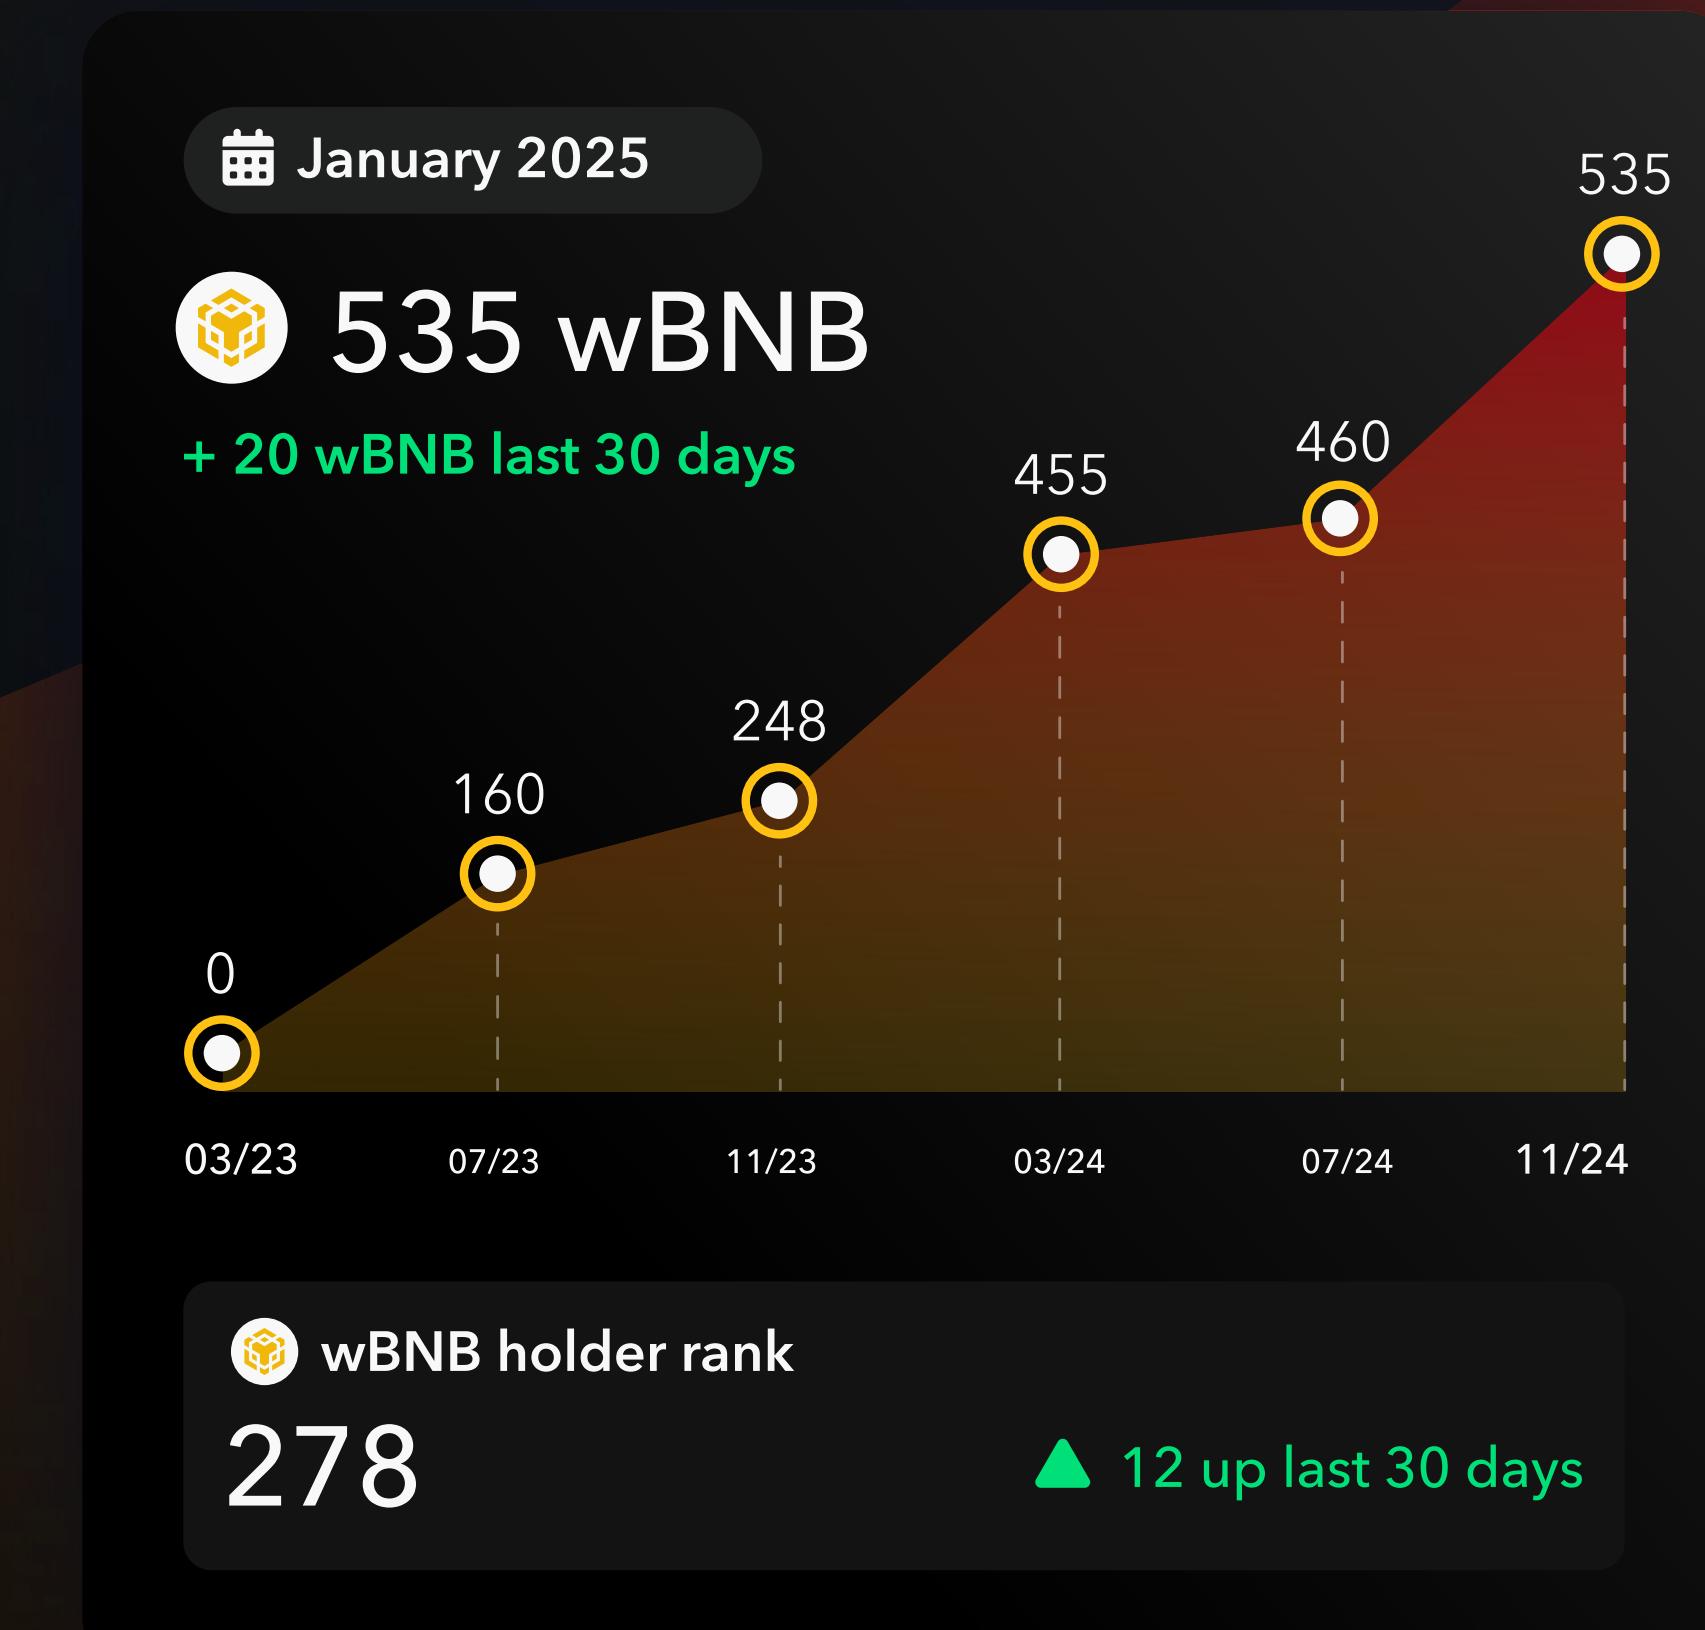

Asset-Backing: Stability in Crypto

SmartDeFi™ Asset-Backing minimizes volatility by creating a rising minimum value that pushes toward the token's market price.

This innovative feature links your token's baseline value to its market price, reducing risk from market fluctuations and ensuring greater security.

With multi-asset backing options like ETH and USDC, SmartDeFi™ enhances diversification and builds a more stable, resilient investment.

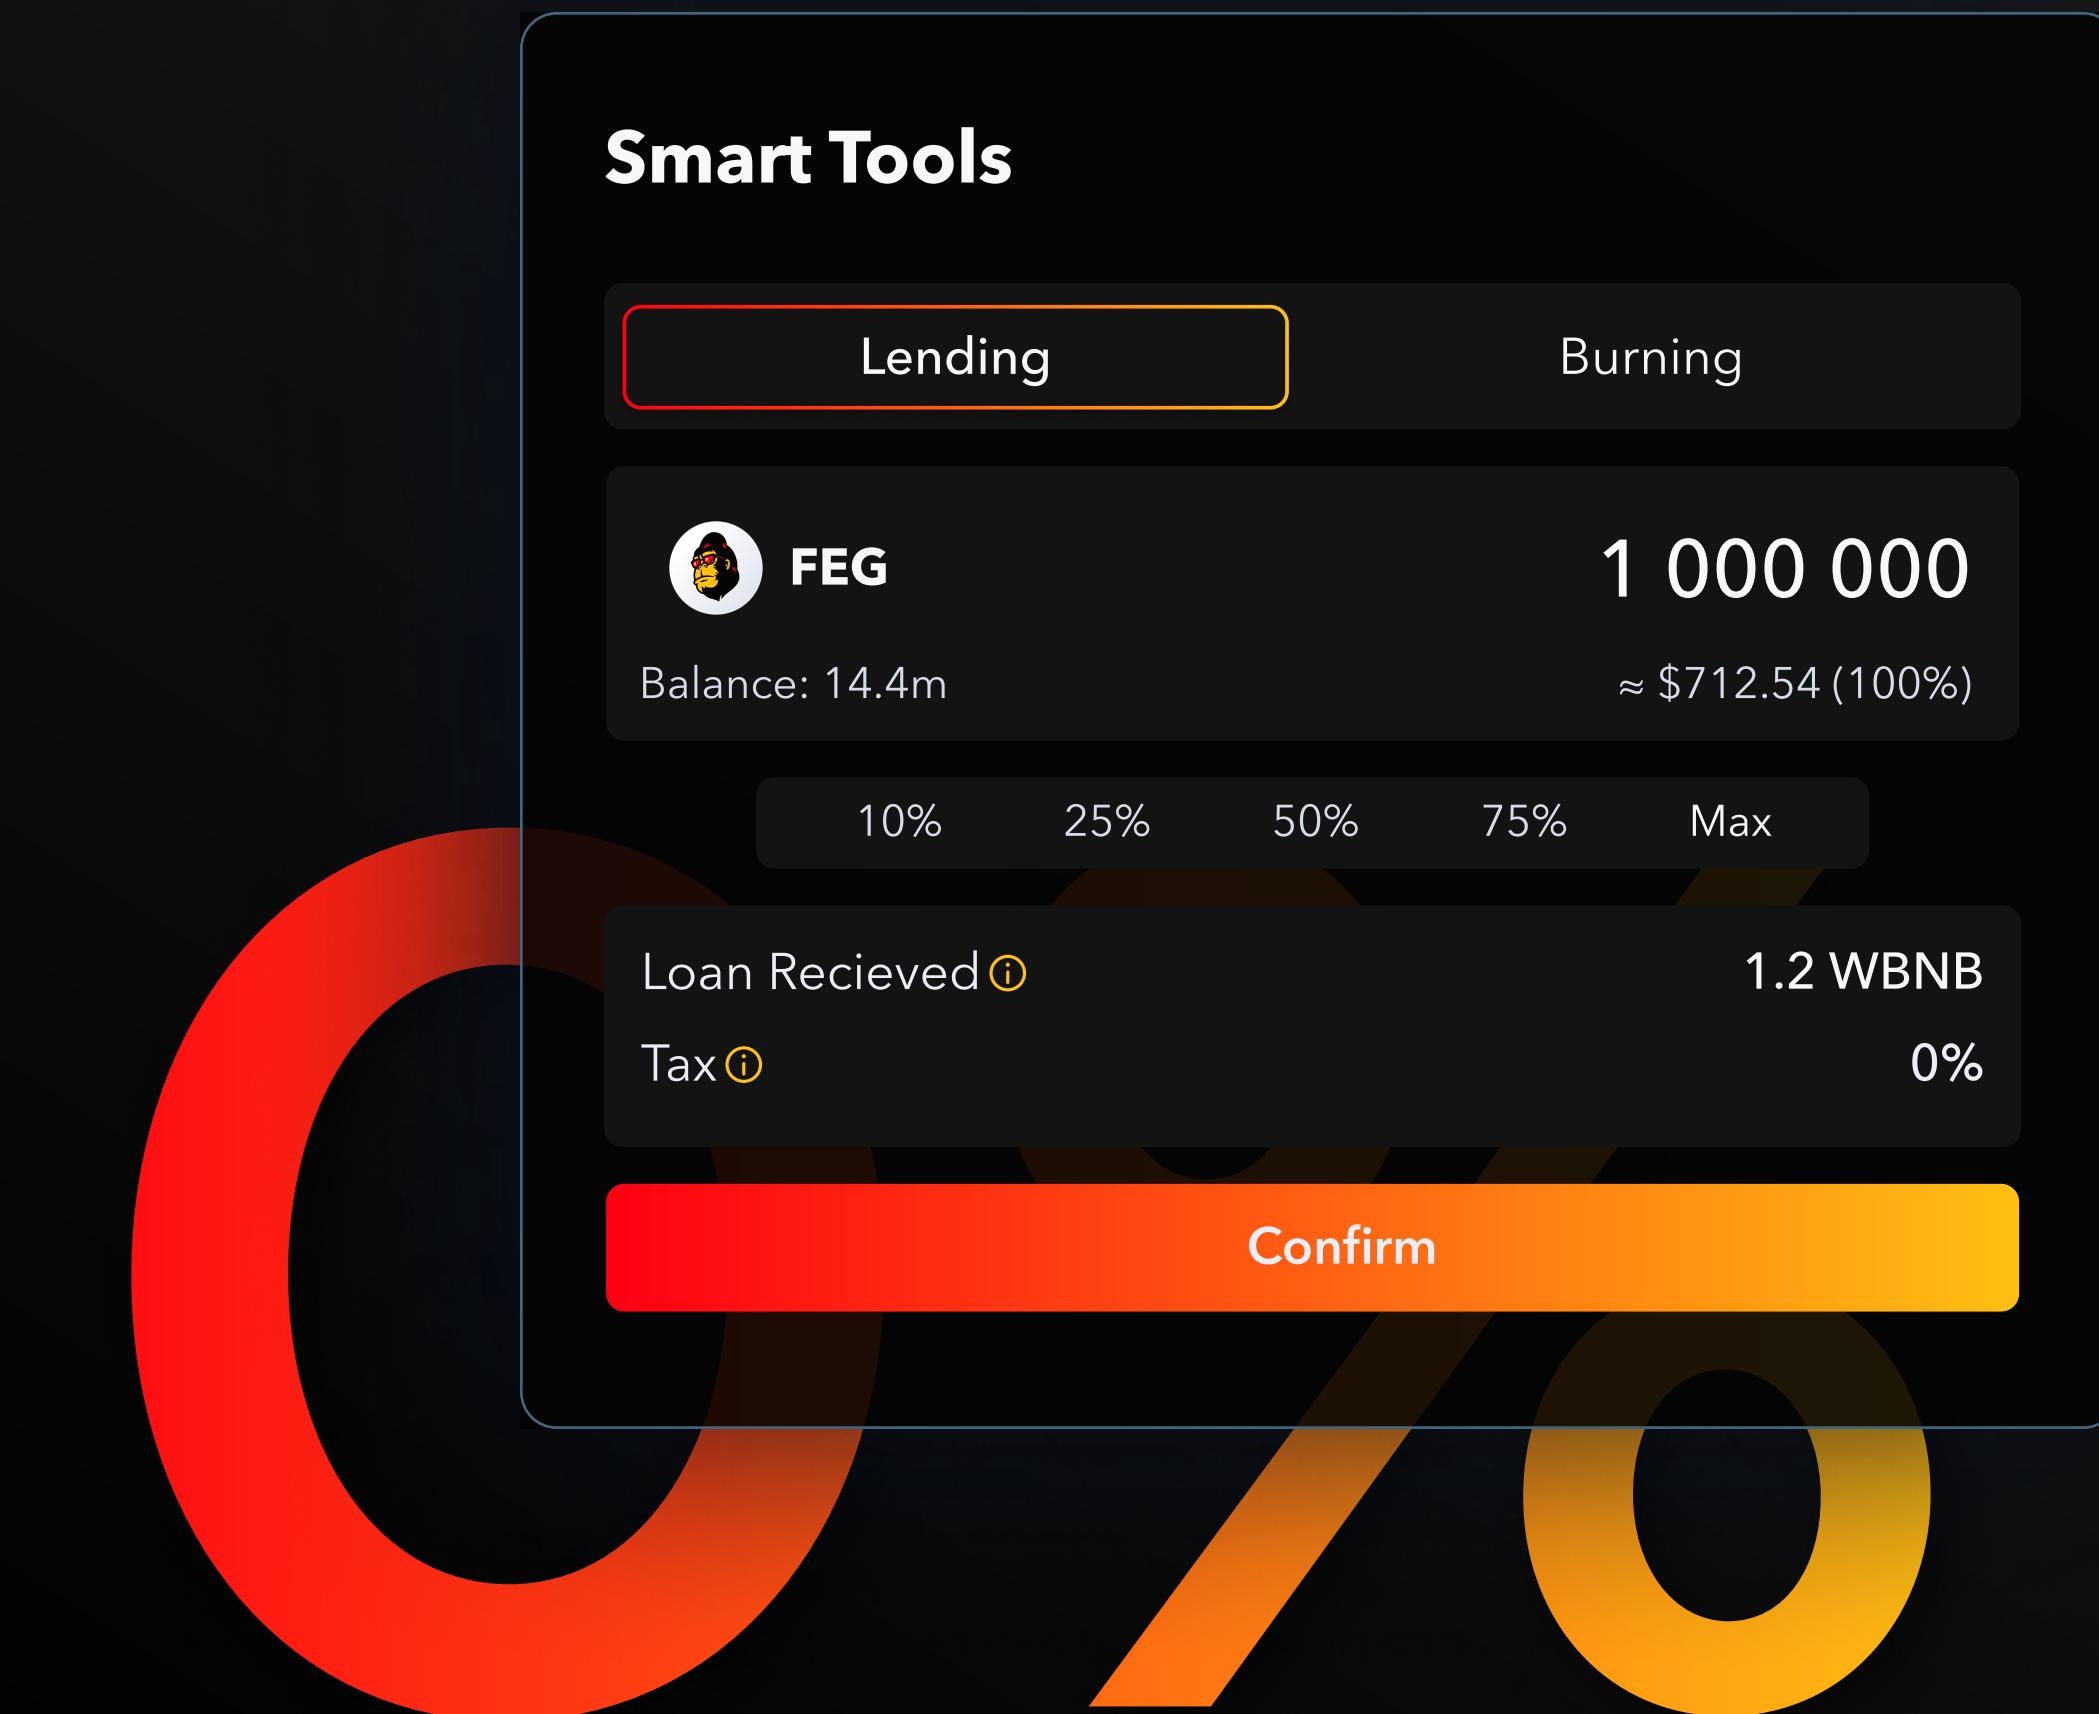

Interest-Free Loans with SmartLending

SmartLending lets SmartDeFi™ token holders borrow instantly against their token's baseline value without selling or burning it.

- Enjoy a 30-day interest-free loan period.
- Extend loans by burning 0.1% of the token, with unlimited renewals.
- Choose to borrow against one or multiple backing assets for added flexibility.
- SmartLending offers convenient, secure access to funds while protecting your token holdings.

Staking with SmartDeFi™

SmartDeFi™ enables token holders to earn rewards through staking.

Token Accumulation

Stakers receive a share of Tokenomics Taxes in the form of SmartDeFi™ tokens.

Project Participation

Projects can allocate tokens to staking pools, boosting staker rewards.

Assets Dividends

Supports dividend payouts from tokenized real-world assets.

My stake

	Accumulated from staking	+ 2,120,000.02 FEG

Real-World Assets (RWA) Tokenization

SmartDeFi™ transforms physical assets into digital tokens for seamless ownership, trade, and leverage on the blockchain, enhancing liquidity and accessibility.

- Secure Transactions: Tokenized assets enable fractional ownership of real estate, art, commodities, and more, with dividend payouts via an audited staking protocol.
- Compliance: Optional KYC ensures secure token distribution, preventing misuse through third-party verification.

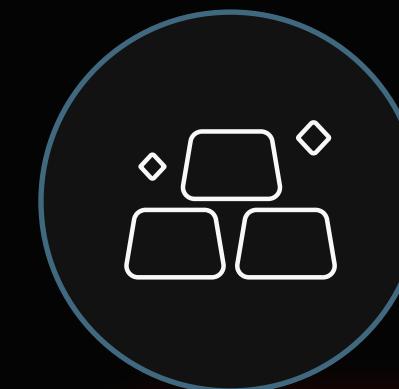

Real Estate and Infrastructure

Tokenizing real estate and infrastructure projects like renewable energy plants will allow for fractional ownership and community investment.

Art, Collectibles, and Intellectual Property

Tokenizing art, collectibles, and the rights to creative works, offers new revenue streams and investment opportunities to more people.

Finance and Investments

Tokenizing commodities, environmental credits, and venture capital opportunities will increase access to these markets and make them available to a wider audience.

Healthcare and Education

Tokenizing healthcare data and educational content can enable control, monetization, and personalized access.

FEG - The Governance Token

✓ Stake FEG and earn rewards

✓ Token Accumulation

FEG Stakers earn 1% of the total trading volume from buys and sells across the DEX.

✓ SmartDeFi™ feeds FEG Ecosystem

A 0.5% protocol fee from every buy and sell across ALL SmartDeFi™ projects on the BNB Chain is collected in BNB.

- 25% of it is converted to FEG Tokens and distributed to stakers.
- 75% of it supports ecosystem growth through development, marketing, and project launches.

✓ Unlimited Rewards

1% of all tokens entering the SmartDeFi™ Staking Protocol are converted into FEG Tokens and distributed to FEG Stakers, ensuring continuous rewards.

✓ Multi-Asset Backing

SmartDeFi™ Tokens offer optional multi-asset backing. The primary asset is tax-free, while additional assets are taxed at 5%, with proceeds sent to the FEG development Multisig wallet to support ongoing development.

STAKE FEG AND EARN REWARDS FROM:

1. FEG TOKEN TRADING

1% of **EVERY BUY and SELL** of FEG token

2. SMARTDEFI™ PROTOCOL

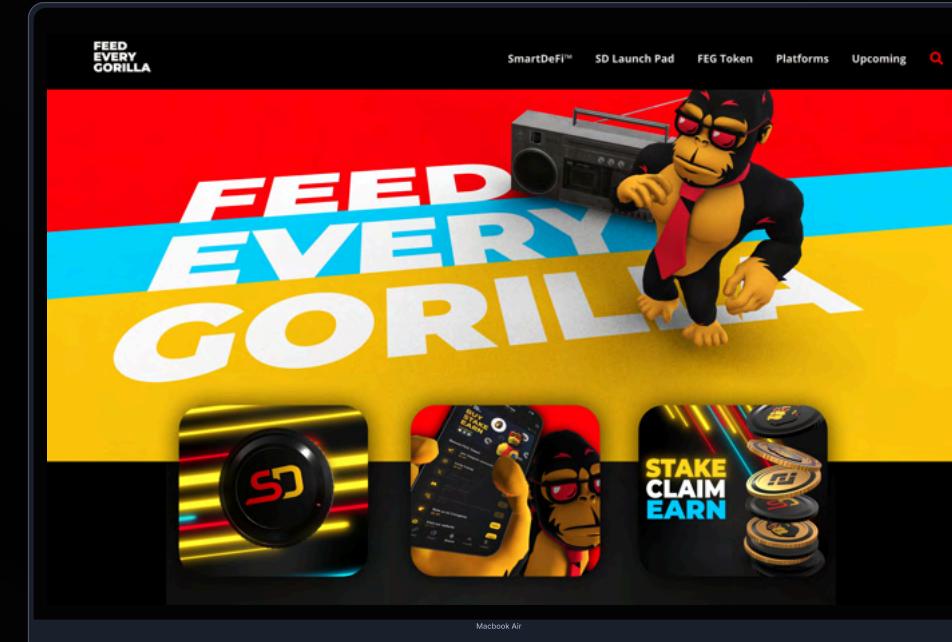

25% of Protocol fee (0.5%) on **EVERY BUY and SELL of EVERY project** that launches from the SmartDeFi™ LaunchPad.

1% Protocol fee on **EVERY staking deposit from ANY SmartDeFi™ project**.

Our Platforms

FEG.io

The official website for FEG Token.

SD LaunchPad

A custom trading and charting platform for all tokens launched through SmartDeFi™, with seamless routing through UniSwap and PancakeSwap, and advanced tools powered by TradingView.

FEGtrack

A mobile app offering real-time project data, charts, market insights, and news, including tracking of SmartDeFi™ token investments. Available on Android and iOS.
